

POWER BUILDER FOR POWER MANAGEMENT CONTROL SYSTEM AUTOMATION SOFTWARE

Abstract of Disclosure

A Power Builder for a power management control system facilitates automated addition and configuration of devices to a system project. By invoking the Power Builder as an option to the system, device selection becomes automated and points associated with the selected devices are automatically created. Main menu screens are generated which contain pre-configured wizards and screens for the selected devices. A configuration update is performed on the system and the project is restarted.
